EDUCATION

B.E. in Information Technology	2027
<i>Pune Institute of Computer Technology</i>	<i>CGPA: 9.3/10</i>
12th Grade	2023
<i>Arham Jr. College, Pune</i>	<i>Score: 77.17%</i>
10th Grade	2021
<i>KV Southern Command</i>	<i>Score: 97.4%</i>

EXPERIENCE

Software Engineering Intern Aug 2026 – Present
Michelin, Pune

- Building full-stack chatbot features across an **Astro + Apostrophe CMS** frontend and a **Python** backend.
- Writing and maintaining **unit tests for every module** to validate expected behavior before merge, and fixing issues surfaced through test failures and logs.

Freelance Software Developer Mar 2026 – Jul 2026
Gabril Industries – Precision Manufacturing & Engineering

- Built a custom **ERP + MES platform** in **Python** integrating procurement, inventory, HRMS, and production workflows.
- Designed backend pipelines and analytics dashboards for machine efficiency and waste monitoring, following version-controlled, modular development practices.

Research Intern – Software Engineering for ML Systems May 2026 – Jun 2026
IIT Kharagpur, Dept. of CSE *Remote*

- Built and validated an end-to-end **PyTorch** training pipeline within the open-source **nnU-Net** framework, adding a custom trainer class with under 0.2% overhead.
- Debugged and patched a scheduler compatibility issue in the framework's core library and **shipped the fix via an open-source GitHub commit**.

Computer Vision Research Intern Nov 2025 – May 2026
IIT Mandi *Remote*

- Developed and evaluated deep learning models for defect detection on large-scale industrial image datasets, improving robustness through systematic preprocessing and testing.

Software Development Intern Jan 2026 – Feb 2026
UNITECTURE, Pune

- Built HRMS and waste-management modules with WhatsApp and ESSL biometric integrations; handled end-to-end deployment and production validation.

Full Stack Developer Intern Jul 2025 – Feb 2026
Unified Transformation Consultants *Hybrid*

- Built production-grade backend services and REST APIs for **gignut.com** using **FastAPI**, optimizing database queries and API performance.

TECHNICAL SKILLS

- **Languages:** Python, C++, Java, JavaScript, SQL
- **CS Fundamentals:** Data Structures & Algorithms, OOP, DBMS, Operating Systems, Networking
- **Backend & APIs:** FastAPI, Django, Node.js, REST APIs, MySQL, MongoDB
- **Testing & Tools:** Unit Testing, Git, Docker, Debugging & Log-based Diagnosis, Weights & Biases
- **ML & AI (applied):** PyTorch, TensorFlow, scikit-learn, OpenCV, HuggingFace Transformers, LangChain

PROJECTS

- **LegalBuddy – RAG-based Conversational AI** [link]: Built an end-to-end backend system for legal document Q&A using FAISS-based retrieval. Processed 200MB+ multi-format documents with domain-specific embeddings and text-classification-based risk scoring.
- **WatchDog.ai – Real-time Anomaly Detection** [link]: Built real-time anomaly detection pipelines for monitoring API behavior using the ELK stack. Developed dashboards and alerting for low-latency logging and performance tracking.
- **Packmate – LLM-powered AI Assistant** [link]: Developed a conversational assistant using LangChain, engineering context-aware prompts and memory handling, reducing trip planning effort by 40%.

ACHIEVEMENTS

- **Competitive Programming:** CodeChef 3-Star; LeetCode max rating 1544
- **Competitions:** Ranked 6th/2000+ at IIIT Hyderabad competition; SIH 2024 Semi-finalist (Top 25 teams from college)

CERTIFICATIONS

- **Oracle:** Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate
- **HarvardX (CS50):** Python, SQL, Cybersecurity
- **The Forage & LinkedIn Learning:** Tata – Data Visualisation; AWS APAC Solutions Architecture; Generative AI Career Path (Microsoft × LinkedIn)
