EDUCATION

B.E. in Information Technology

Pune Institute of Computer Technology

12th Grade

Arham Jr. College, Pune

10th Grade

KV Southern Command

2027

CGPA: 9.28/10

2023

Score: 77.17%

2021

Score: 97.4%

EXPERIENCE

Computer Vision Research Intern

IIT Mandi

Nov 2025 – March 2026

Remote

- Conducting research on **Solar Cell Defect Detection** and classification using advanced Computer Vision techniques.
- Developing deep learning models to automate the identification of micro-cracks and anomalies in photovoltaic cells.
- Processing large-scale datasets to improve model accuracy and robustness for real-world industrial inspection.

Software Development Intern

UNITECTURE

Dec 2025 – Feb 2026

Pune

- Engineered an internal **HRMS** to streamline organizational workflows.
- Developed modules for employee data management, attendance tracking, leave processing and Task Management.
- Focused on creating a secure, user-centric interface to improve internal administrative efficiency.

Full Stack Developer Intern

Unified Transformation Consultants

July 2025 – Feb 2026

Hybrid

- Developed **gignut.com**, a production-grade B2B web platform, handling end-to-end development and deployment.
- Designed and implemented scalable backend services using **FastAPI** to support core business workflows.
- Built secure and efficient REST APIs and integrated them with frontend components.
- Optimized API performance, database queries, and overall system responsiveness for scalable B2B usage.

Web Development Intern

Learncraft Engineering and Consultant

May – June 2025

Remote

- Developed modular and responsive **React.js** applications with a focus on clean architecture and performance.
- Collaborated with backend services and integrated **REST APIs** for production-grade deployments.

TECHNICAL SKILLS

- **Languages:** Python, C++, Java, JavaScript, SQL
- **LLM & GenAI:** HuggingFace Transformers, LangChain, LLaMA, Mixtral, Qwen, RAG Pipelines, Prompt Engineering, SentenceTransformers, Embeddings
- **ML & AI:** PyTorch, TensorFlow, scikit-learn, OpenCV, NLP, Text Classification
- **Voice & Real-Time AI:** Speech-to-Text (STT), Text-to-Speech (TTS), Low-latency inference pipelines (conceptual + implementation)
- **Backend & APIs:** FastAPI, Django, Node.js, REST APIs, MongoDB, MySQL
- **Vector DBs & Tools:** FAISS, ChromaDB, Docker, Git, Weights & Biases, Streamlit
- **CS Fundamentals:** OOP, DBMS, OS, Networking, Algorithms

PROJECTS

- **LegalBuddy – RAG-based Conversational AI** : Built an end-to-end Retrieval-Augmented Generation system for legal document Q&A using FAISS and LLMs. Processed 200MB+ multi-format documents, implemented domain-specific embeddings, legal risk scoring via text classification, and dual-mode summarization (jargon / plain English).
- **Packmate – LLM-powered AI Assistant** : Developed an LLM-driven conversational assistant using LangChain and Groq APIs. Engineered context-aware prompts and memory handling to deliver personalized recommendations, reducing trip planning effort by 40%.
- **WatchDog.ai – Real-time Anomaly Detection** : Implemented real-time anomaly detection pipelines with ELK stack and React dashboards. Focused on low-latency logging, monitoring, and alerting for production APIs.
- **WaySecure – AI-based Route Recommendation** : Applied K-Means clustering on crime datasets to generate safer route recommendations. Integrated map-based visualization and real-time overlays for decision support.

ACHIEVEMENTS

- **IIIT Hyderabad Coding Contest:** Ranked 6th among 2000+ participants nationwide.
- **Smart India Hackathon 2024:** SIH Semi-finalist – Top 25 teams from college.
- **Techfiesta Finalist:** Presented AI-powered safety solution in final pitch round.

CERTIFICATIONS

- **HarvardX:** CS50P, CS50SQL, CS50Cybersecurity
- **LinkedIn Learning:** Generative AI (Microsoft), Data Analytics
- **The Forage:** Goldman Sachs, Mastercard, AWS, Accenture Virtual Experience
